## Cleanability

Our triple wash arm system is engineered to focus more water on the dishes for superior cleaning performance. Our adjustable rinse system keeps you in control - choose Econo or Turbo based on the soil level of each load. The 27" vertical chamber clearance accommodates larger ware so don't forget the pots and pans! The DynaStar HH-E is dual certified as a dishwasher and a potwasher.

## Operation

Easy-to-read digital controls, handles on three sides, and a door-activated drain closure make operation of the DynaStar HH-E a breeze.

## Serviceability

Ease of serviceability is important to Jackson, so the DynaStar HH-E was designed to make service access easy. All service parts can be accessed white the unit is in place, so there is no need to pull it from the wall or disconnect tables.

Advisory: Jackson WWS, Inc. <u>DOES NOT</u> endorse "Tankless On-Demand" water heaters for use with our dishmachines. Jackson WWS, Inc. <u>DOES</u> endorse, and highly recommends, standard "tank" style water heaters, sized to properly handle the water heating requirements of the facility.

\*Racks per hour calculated with NSF suggested load time of :05 for door-type (straight thru) dishmachines.

\*\*Gallons per hour calculated with NSF suggested load time of :05 for door-type (straight thru) dishmachines.

Because the DynaStar HH-E is equipped with a pumped rinse, a PRV is not required unless flow pressure is over 65 PSI. Flow pressure under 15 PSI could affect fill/start-up time. DynaStar HH-E W/O (no booster) is not equipped with a rinse pump, so a PRV is recommended and flow pressure is 10 ± 2 PSI.
