NXP-HTU

The NXP-HTU is a basic, high temperature sanitizing undercounter dishwasher that comes with a great price point. We call it basic, but it's far from that! It provides exceptional cleaning performance and high-temperature sanitizing while consuming only 0.83 gallons of water per rack. The normal cycle cleans 30 racks per hour, which is enough capacity to clean 750 dishes or 1,080 glasses per hour.

The NXP-HTU is simple to operate with automatic fill, push button start, and two selectable cycles for normal or heavy soil loads. Other features include Sani-Sure™ final rinse system, built-in chemical pumps and priming switches with auto-prime, a delime cycle and more! It's perfect for coffee shops, bars, quick service restaurants, small healthcare facilities, day care centers and convenience stores.
